## PREFACE

This issue of the *Population and Vital Statistics Part of the Statistical Register of New South Wales* contains population and vital statistics for 1962 and earlier years.

In the detailed "Causes of Death" tables in *Section II. Vital Statistics*, each relevant category in the current International Statistical Classification of Causes of Death has been listed separately, irrespective of whether a death in the period concerned was attributable to that category.

The statistics given in this publication should be read in conjunction with the *Official Year Book of New South Wales*. For the most recent statistics, the reader should refer to other publications of the Bureau, particularly the *Statistical Bulletin* and the *Monthly Summary of Business Statistics*.

My thanks are tendered to the responsible officers of the various State and Commonwealth Departments and to others who have supplied information, often at considerable trouble.

K. Davison  
Deputy Commonwealth Statistician  
and  
Government Statistician of New South Wales

Bureau of Census and Statistics,  
Sydney.

## EXPLANATORY NOTES

**I. Boundaries of Metropolis.** The boundaries of the Metropolis, as defined for statistical purposes, have been extended to include the following local government areas:—

- (a) From the date of the 1911 census—  
Shire of Ku-ring-gai (incorporated as a municipality in 1927).
- (b) From 1st January, 1929—  
Municipalities of Auburn, Bankstown, Granville, Lidcombe, and Parramatta.
- (c) From 1st January, 1933—  
Municipalities of Dundas, Ermington and Rydalmere, and Holroyd (Pitt and Merrylands Wards only).
- (d) From 1st January, 1954—  
The Guildford and Wentworth Wards of Holroyd Municipality, Fairfield Municipality, Sutherland and Warringah Shires, and the following parts of Blacktown and Liverpool Municipalities and of Baulkham Hills and Hornsby Shires:—
  - i. That part of Liverpool Municipality north and east of a line commencing at the junction of Hume Highway and Campbelltown Road (Cross Roads), and following Hume Highway, Bringelly Road, and Old Cowpasture Road to the northern boundary of the Municipality.
  - ii. That part of Baulkham Hills Shire south and east of a line commencing at the junction of Old Windsor Road and Seven Hills Road, Seven Hills, and following Seven Hills Road, Chapel Lane, New Windsor Road, Gladstone Road, Victoria Road, Carrington Road, Showground Road, Rowallan Avenue, Castle Street, and Old Northern Road to the shire boundary at Rogan's Hill.
  - iii. That part of Blacktown Municipality east of a line commencing at the junction of Chandos Road and Eastern Creek on the southern boundary of the Municipality, and following Eastern Creek, Breakfast Creek, Sunny Holt Road, and Meurants Lane to the north-eastern boundary of the Municipality on Old Windsor Road, Parklea.
  - iv. That part of Hornsby Shire south and east of a line commencing at the junction of Castle Hill Road and New Line Road, West Pennant Hills, and following New Line Road, Boundary Road, Thornleigh Gully Creek, Fish Pond Creek, Berowra Creek, Berowra Ferry Road, the Great Northern Railway, a line drawn south-easterly from the 21 mile peg (between Berowra and Mount Ku-ring-gai) to the head of Apple Tree Bay, Apple Tree Bay, and Cowan Water to the eastern boundary of the Shire at Bobbin Head.

In *Section I. Population*, unless otherwise stated, figures relating to the Metropolis are on the basis of the boundaries as delimited from 1st January, 1954. Figures for the Metropolis in *Section II. Vital Statistics* are based, unless otherwise stated, on the boundaries at the dates shown.

**2. Newcastle Urban Area.** This area, which was defined for statistical purposes in January, 1954, comprises the City of Newcastle and portion of the adjoining Lake Macquarie Shire. The portion of the Shire is that part east and north of Lake Macquarie, bounded on the west by Cockle Creek, Cocked Hat Creek, West Wallsend Road, and Edgeworth-Minmi Road.

**3. Aborigines.** Full-blood aborigines have been excluded from all population statistics, and have been excluded from statistics of births and deaths since 1st January, 1933.

### 4. Population and Migration Statistics

#### (a) *Population of New South Wales*

The periodic census enumerations are the most accurate source of information about the population of New South Wales.

For periods between censuses, the population of the State is estimated by adding the subsequent natural increase (the excess of births over deaths) and recorded net migration (the excess of arrivals over departures) to the population ascertained at the previous census. Accurate data as to natural increase are ensured by the compulsory registration of births and deaths. A system of recording arrivals and departures is maintained, but complete records of interstate movements are not available and the recorded net migration is therefore approximate. The intercensal estimates are subject to revision when the population is ascertained at the next census, and any discrepancy disclosed by the census is added to the recorded net migration.

In this issue, the population estimates for periods between the 1954 and 1961 censuses of population have been revised in the light of the final results of the 1961 census, which disclosed that the estimated population of the State at 30th June, 1961 had been understated by 4,662 or by 0.1 per cent.

#### (b) *Migratory Population*

Shipping population and other migratory population are not included in any subdivisions of the State.

## EXPLANATORY NOTES (*continued*)

### 4. Population and Migration Statistics (*continued*)

#### (c) Oversea Arrivals and Departures

- i. The figures of overseas arrivals and departures represent ship and aircraft passengers disembarking from overseas (arrivals) or embarking for overseas (departures) at New South Wales ports. They include overseas passengers travelling via New South Wales to or from other States, and exclude those travelling via other States to or from New South Wales. The figures should not be taken to represent the true overseas migration to or from New South Wales.
- ii. Oversea arrivals and departures are classified according to the length of their stay, as stated by travellers upon arrival in or departure from Australia. In the classification:—  
*Permanent Movement* covers persons arriving to settle permanently in Australia and Australian residents leaving to settle permanently abroad.  
*Long-term Movement* comprises—in the case of arrivals: Australian residents returning after one year or more in an overseas country and visitors intending to stay in Australia for at least a year; and in the case of departures: Australian residents leaving to stay in an overseas country for at least a year and visitors leaving after a stay of one year or more.  
*Short-term Movement* covers all other arrivals and departures, including the movement of Australian troops (irrespective of period of stay overseas) and the departure of persons who stated on departure that they had come to Australia intending to settle but had stayed for less than a year.  
 The intended length of stay, as stated by Australian residents departing and non-residents arriving, represents the traveller's intention at the time. Many travellers subsequently change their intentions, and this must be borne in mind in interpreting the statistics.
- iii. Members of the crews of ships and aircraft are excluded from the figures of overseas arrivals and departures.

### 5. Vital Statistics

- (a) *For Subdivisions of the State.* The births registered in New South Wales are allocated to a subdivision of the State according to the usual residence of the mother, and the deaths registered are allocated according to the usual residence of the deceased; in cases where the usual residence is outside the State, the birth or death is allocated to the subdivision in which it occurred. As the information reported is in many cases insufficient to establish the usual residence with complete accuracy, the figures for individual local government areas should be regarded as approximate.
  - (b) *Rates.* Rates per 1,000 of mean population shown in this issue have been calculated on estimates of population revised in accordance with the final results of the 1961 census.
6. **Still-births.** For purposes of record, still-births are registered as deaths as well as births, but still-births are not included in the statistics of deaths. Compulsory registration of still-births became effective in 1935. A still-born child is defined as "any child of seven months gestation or over, not born alive, and includes any child not born alive which measures at least fourteen inches, but does not include any child which has actually breathed".
7. **Classification of Causes of Death.** From 1st January, 1958, deaths have been classified according to the Seventh Revision (1955) of the International Statistical Classification of Diseases, Injuries, and Causes of Death. The international rules for selecting the underlying cause of death have been used in coding, and the full 3-digit classification (with some 4-digit categories) has been used in tabulation. Accidents, poisonings, and violence (Class XVII) have been classified according to the external cause of injury.

### 8. Statistical Summary (pages 133 to 136)

- (a) For the sake of uniformity, the population estimates published by the Commonwealth Statistician have been adopted for all years. On this account, estimates of population shown for years prior to 1921 differ slightly from the estimates (which included full-blood aboriginals) published in the 1949-50 and earlier issues of *Population and Vital Statistics*. All estimates have been adjusted in accordance with the results of the various censuses. Birth, death, and marriage rates shown on page 136 have been based on these population estimates.
- (b) The figures of natural increase shown for 1932 and earlier years in Table 2 were compiled by the Government Statistician of New South Wales, and are the same as in previous issues of *Population and Vital Statistics*. They include births and deaths of full-blood aboriginals, and consequently differ from the figures published by the Commonwealth Statistician.
- (c) In Table 2, the difference between (i) the sum of the natural increase and the net migration, and (ii) the total increase in population, represents:—
  - i. for the period 1907 to 1932, the difference between the natural increase as shown and the natural increase as compiled by the Commonwealth Statistician and used in the population estimates; and
  - ii. for the period from September, 1939 to June, 1947, the deaths of defence personnel.

\* Bogan Shire is divided between Central Plain and Western Divisions.

† Walgett Shire is divided between Central Plain and Western Divisions.

‡ Carrathool and Waradgery Shires are divided between Riverina and Western Divisions.

¶ From 1st July, 1961, the boundaries of Cobar and Darling Shires were adjusted, resulting in a net 84,500 acres (with a negligible population) being added to Cobar Shire.

§ Figures of births and deaths for areas contiguous to the State's borders may be affected significantly by the registration in N.S.W. of births and deaths of residents of other States, and vice versa (see Explanatory Note 5 (a), page 6). Adjusted totals based on usual residence, irrespective of State of registration, are shown below for the areas mainly affected:—

North Coast Division: 3,827 births, 1,560 deaths (Kyogle S. 262 b., 99 d.; Tweed S. 525 b., 199 d.).

Northern Tableland Division: 1,379 births, 531 deaths (Tenterfield M. 75 b., 35 d.; Tenterfield S. 90 b., 31 d.).

Southern Tableland Division: 1,638 births, 532 deaths (Queanbeyan M. 258 b., 78 d.; Yarrowlumla S. 71b., 21d.).

North Western Slope Division: 1,816 births, 529 deaths (Ashford S. 83b., 21 d.; Yallaro S. 125 b., 25 d.).

South Western Slope Division: 3,402 births, 1,142 deaths (Albury M. 564 b., 213 d.; Tumbarumba S. 113 b., 29 d.).

North Central Plain Division: 1,090 births, 260 deaths (Booolooroo S. 97 b., 19 d.; Boomi S. 92 b., 18 d.).

Riverina Division: 2,491 births, 631 deaths (Berrigan S. 168 b., 48 d.; Corowa S. 150 b., 51 d.; Murray S. 74 b., 23 d.; Wakool S. 137 b., 24 d.).

Western Division: 1,618 births, 492 deaths (Balranald S. 89 b., 30 d.; Wentworth S. 171 b., 30 d.).

Note. Comparisons of causes of death from year to year should be made with caution, as a number of factors (such as changes in the mode of certification and classification, improvement in diagnosis, etc.) may have influenced the figures. Information obtained from certifiers as the result of more intensive query programmes introduced in 1960 and 1961 made more precise classification possible, and led to significant changes in the number of deaths assigned to certain disease categories. The categories principally affected have been marked with an asterisk in this table.

† Excess of live births over deaths.

‡ Excess of overseas and interstate arrivals over departures. The sign (—) denotes an excess of departures over arrivals.

¶ Figures for Net Migration for 1933 and later years have been revised to include adjustments for discrepancies in population estimates disclosed by periodic censuses.

§ For Natural Increase and Net Migration, the rate is the increase per 1,000 of mean population; for Total Increase, the rate is the percentage increase based on the population at the end of the previous year.

|| Australian Capital Territory separated from New South Wales on 1st January, 1911. Jervis Bay area transferred to Australian Capital Territory on 4th September, 1915; population adjusted from 1st January, 1916.

\*\* Excess of births over civilian deaths from September, 1939 to June, 1947.

†† Excludes troop movements from September, 1939 to June, 1947.
